- github.com/elisabettachisso

A career that began in software development, grew through security and infrastructure management, and is now moving increasingly towards IT governance. I put technical knowledge to work for business decisions, with attention to risk, cost and operational needs.

01

Experience and education

Experience — Education

Security & IT Infrastructure Analyst

03/2026 – present

Edge Group · Milan · Insurance holding company

I look after security and infrastructure for two Microsoft 365 tenants, serving a group of about twenty companies and 350 users, combining technical management with the coordination of vendors, budgets and internal procedures.

- I coordinate remediation following the 2026 internal and external VAPT.
- I configured collaboration between the tenants in line with the segregation requirements linked to IVASS compliance.
- I have handled around ten integrations of acquired companies, from due diligence to the IT work needed for the merger.
- I managed the rollout of 200 company smartphones with Samsung Knox and Microsoft Intune.
- I help define operational processes, from onboarding to the handling of support requests.

MSc in Computer Engineering

10/2023 – ongoing

University of Trieste

Thesis: O.Di.Ri.S., a platform for assessing insurance-related clinical risk in healthcare facilities.

Full Stack Developer

11/2022 – present

Insureteach S.r.l. · Trieste

I have worked on the development of Insurelab, a platform for courses and academies, and of YourSpace, a CRM with a client portal, from requirements analysis to release. The role covers back-end and front-end development, and working with users to turn operational needs into application features.

02

Skills

- **IT management and processes**
  Vendor coordination, IT budgeting, activity planning, company integrations, ITSM, procedures and SLAs, IVASS compliance support.
- **Security**
  VAPT remediation coordination, NIST Cybersecurity Framework, Sophos.

01

Experience and education (cont.)

IT Specialist
11/2022 – 04/2026

Edge Broker · Trieste

I managed the company's information systems, working across software development, infrastructure and licensing. I coordinated a cybersecurity project based on the NIST Cybersecurity Framework, as part of the company's digital transformation.

Master in Blockchain and Digital Assets
2022

MasterZ – AIO Blockchain

BSc in Computer Engineering
10/2019 – 03/2023

University of Trieste

Intern
2018

Brighton Language College International · Brighton, UK

Supported the school office and assisted teachers during English lessons, in an international environment.

Product Management Intern
2017

Nice Group · Oderzo

Contributed to the launch of a new product and to competitor analysis for the Gates & Doors line.

Scientific High School Diploma
2014 – 2019

ISISS Antonio Scarpa · Motta di Livenza

04

Certifications

ECDL
European Computer Driving Licence

Cambridge First Certificate in English (B2)
Cambridge English

Digital Marketing Diploma
Studio Samo · 2018

05

Music

Pre-academic certifications, level A

Piano

Music theory, rhythm and ear training

Conservatorio Agostino Steffani · Vittorio Veneto

06

Interests

Curious by nature: in the kitchen I experiment with recipes from all over the world, and in music I move from the piano to genres miles apart. I browse flea markets for objects with a story, which is where my passion for design began.

07

Projects

IT integration of acquired companies
Due diligence, an integration plan and coordination of the work through to the merger, applied to around ten companies with vendors and internal contacts.

Microsoft 365 · Entra ID · IT coordination

Microsoft 365 and SharePoint migrations
Mailbox migrations between tenants and archives moved from on-premises file servers to SharePoint, with attention to business continuity.

MigrationWiz · ShareGate · SharePoint · Exchange Online

Mobile fleet management
200 company smartphones with automatic enrolment on first start-up and configurations and policies applied consistently.

Samsung Knox · Intune · Android Enterprise

YourSpace — CRM and client portal
Insureteach's CRM with a client web portal, developed from the back end to the interface, starting from an analysis of the processes.

Python/Flask · Node.js · SQL Server · Nginx

O.Di.Ri.S. — MSc thesis
Clinical risk in healthcare facilities: an LLM-based voice agent collects adverse events and feeds a risk index for the risk funds (Ministerial Decree 232/2023).

Python · LangGraph · LLM

Venetocore — Inventory management app
Stock, customer and supplier orders, and design images for a small t-shirt startup founded by friends, usable on a smartphone as a PWA.

JavaScript · Supabase · PostgreSQL · PWA

I authorise the processing of the personal data contained in this CV pursuant to Regulation (EU) 2016/679 (GDPR).
