Computer engineer in the regulated insurance sector. I work hands-on on Microsoft 365 security and infrastructure for a group of around twenty companies and, alongside the technical work, coordinate vendors and colleagues on larger projects, manage budget and procedures, and handle the IT integration of acquisitions. I have a complete view of the group's IT infrastructure.

07 INTERESTS

Curious by nature, with tastes that range widely. In the kitchen I experiment with recipes from all over the world and happily try what I don't know yet; in music I move from the piano to genres miles apart. In my free time I browse flea markets for objects with a story, which is where my passion for design began.
