PROFILE

My career combines software development, security and infrastructure, with growing responsibility for managing IT across an insurance group. I handle integration projects, vendors, budgets and procedures, putting my technical experience to work for business decisions. I am steering my growth towards IT governance, with attention to risk management and the needs of the organisation.

EXPERIENCE

Security & IT Infrastructure Analyst
03/2026 – present

Edge Group · Milan · Insurance holding company

- Security and infrastructure management for two Microsoft 365 tenants serving about 20 companies and 350 users, responsible for vendor coordination, IT budget and operating procedures.
- Coordination of the IT integration of acquired companies, from due diligence to planning and delivery, including tenant-to-tenant migrations and moving archives to SharePoint.
- Coordination of internal and external VAPT and remediation; implementation of security policies across the Microsoft ecosystem and of cross-tenant collaboration in line with IVASS segregation requirements.
- Centralised management of company devices: enrolment of 200 endpoints in Microsoft Intune and rollout of 200 smartphones with Samsung Knox.

Full Stack Developer
11/2022 – present

Insureteach S.r.l. · Trieste · Insurance training and software

- Requirements analysis, design and development of YourSpace, a platform for managing clients, policies, claims and negotiations, with a client portal.
- Development of Insurelab, a training and academy platform, following the development cycle from needs analysis to release.

IT Specialist
11/2022 – 04/2026

Edge Broker · Trieste · Insurance broker

- Managed information systems and coordinated a cybersecurity project based on the NIST Cybersecurity Framework.

EARLIER EXPERIENCE
